STRUCTURED CABLING SYSTEMS

Building Your IT Communication

Osool Technical System is a full-service network cabling provider with the resource to design and implement structured cabling. Providing network cabling services throughout a business involve cable laying, installation of connector-face plates, Network cabinets and Testing of cables.

02

03

FIRE DETECTION & ALARM SYSTEM

Stay Alert of Fire & Smoke

A fire alarm system is a unit made of a few gadgets, which utilizes visual & sound signalization to caution individuals about a fire, smoke, or carbon monoxide which occurs in the specific area. Fire Alarms are generally set in fire alarm system to give coverage to residential or private buildings. The warning or the alarm generated by fire alarm system can be a siren, bell or a light. Some fire alarm system these days use special warnings such as generating a voice message or making a phone call to concerned department.

FIRE EXTINGUISHING & FIRE FIGHTING SYSTEMS

Suppression & Protection from Fire

Fire protection system combines different firefighting equipment & processes to keep your property or building safe from destructive fire. Fire protection equipment includes fire alarm system, fire extinguisher & sprinkle system to avoid the building from heavy damage caused by the fire. When these systems are combined it ensures that your property or the building is completely protected.
